

Appl. No. : **10/624,864**
Filed : **July 22, 2003**

AMENDMENTS TO THE CLAIMS

31. (Currently Amended) An endovascular device for percutaneous deployment of an endovascular apparatus, the device comprising:

a telescoping sheath and catheter, including a plurality of incrementally-sized segments that are slideably received within one another;

an introducer slideably received within the sheath; and

an inflatable balloon slideably received within the sheath.
